***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 25 and 27-30 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Dorma.

Only the tensioning tool is being recited. See housing 47, any external portion of which may be considered a stop, including the angled portions to the right side in Fig. 3. The internal portion of the housing contains the gearing, motor, etc. as seen in Fig. 5, which together meets the limitation of “coupler”. See also “boss” 104.

***Response to Arguments***

Applicant's arguments have been fully considered but they are not persuasive. As indicated above, only the tensioning tool is being claimed. Very little in the way of structure is recited. The structure of Dorma, as discussed in detail above, is “capable” of operating with the functionally recited elements even if it was not intended to do so.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
